

Peirce Island Wastewater Treatment Plant

OWNER
City of Portsmouth, NH

ENGINEER
AECOM

PROJECT HIGHLIGHTS
Control Systems
Integrator for the new
\$75 Million Plant.

EII has been selected as control systems integrator for the new \$75,000,000.00 upgrade project at the Peirce Island Plant starting in 2017. The Peirce Island WWTP Project is a 4-year project to upgrade the whole plant to a 6.1 MGD capacity. For this project EII has been chosen to provide all instrumentation, integrate controls into SCADA, and integrate a new thin client system so operators can control SCADA from any building in the facility.
